

## 1. Nevada Educational Technology Survey

Thank you for participating in the Nevada Educational Technology Survey. This annual survey collects information required for Federal and State reporting and will inform the biennial educational technology needs assessment required by NRS 388.795. Information obtained in this survey will influence state educational technology policies and funding. Please answer the questions accurately.

If you wish to prepare your answers prior to entering the survey, a printable PDF copy is available [HERE](#).

## 22. Nevada Educational Technology Survey

### Classroom Technology Tools

- \* 1. Report the number of classroom computers (laptop, netbook, or desktop) used primarily by students for instructional purposes and owned by the school that are connected to the Internet through:

a dial-up connection that are 5-years-old or newer

a dial-up connection that are older than 5-years-old

a high-speed connection that are 5-years-old or newer

a high-speed connection that are older than 5-years-old

- \* 2. Report the total number of computers (laptops, netbooks, and desktops) in the building including those used for instruction, by administrators, in labs, in libraries, etc. that are supported by IT technicians.

- \* 3. Report the number of mobile learning devices used by students for instructional purposes. This may include iPods, tablets, e-readers, netbooks, Androids, smart phones, and any other mobile devices that access the Internet.

- \* 4. Report the number of interactive projection systems in classrooms. These may include interactive whiteboard, tablet, or slate systems. These may also include SMART tables.

## 23. Nevada Educational Technology Survey

### Classroom, IT Technician, and Coach Counts

- \* 1. Report the number of classrooms used for student instruction in the school.

- \* 2. How many IT technicians support your building? Report in terms of FTE. If technicians are district-based, divide the number of techs by the number of schools and report in terms of one-hundredths (.00). Contact your district if you are unsure how to answer this.

- \* 3. How many classroom technology integration coaches support your building? Report in terms of FTE. If coaches are district based, divide the number of coaches by the number of schools and report in terms of one-hundredths (.00). If you are unsure how to answer this, contact your district.

## 24. Nevada Educational Technology Survey

You are done! Thank you for completing this survey. Your participation is very important and will help shape the future course of ed tech in NV schools.
